Saves Lives

Melanoma is the 6th most common cancer in the U.S.

Melanoma causes 75% of deaths from skin cancer.

Early Detection Is Essential

Many skin cancers are 95% curable with early detection and treatment.

The longer the cancer grows, the greater the risk of death from the disease.

It's Easy

90% of melanomas can be spotted by one of our Physician Extenders.

Check your skin between visits with your dermatologist.
